Implement Worksheet 21 REVISIONS

To prepare for the Beta test, you adjust, edit, and change the project pieces used in the Prototype and Alpha Test. Do this according to the suggestions and feedback on the forms from the Alpha Test. All the changes and revisions will help make your project pieces better for the Beta test.

You are getting ready to create all the new pieces that remain to be done on your project plan: new graphics, new instruction and text, and new screens.

List some obvious changes that will make your project better.

General project revisions:

Select the most critical recommendations based on time to make changes, resource availability, degree of change requested, test results, feedback from others, and relationship to course goals.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
11. _____
12. _____

**Meet with your team or your teacher to decide what is possible to improve.
List improvements in order of priority of what to fix, add, or delete:**

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
11. _____
12. _____

Make the improvements and try them out before you do the Beta Test.
